# Hey John, who are you?

## My academic stuff?

- I was not a natural academic who published stuff – not a career academic on course for Prof. status...
- I was always bothered that students could use what we “taught” and worked hard to make the academic literature easier to comprehend and use....
- I was the highest fee earning consultant academic....
- I supervised 3 successful Doctoral completions
- **This channel reflects my concern for correcting the “simple to teach” stuff, and towards thinking through what is much more useful**
